Other Information:

During my 15 years as a maintenance electrician at BFN, I have been privileged to benefit from TVA throughout my entire career. My father's 25-year tenure with TVA, leading up to his retirement in 1995, has been instrumental in shaping my professional journey. Serving as the shop steward in the MEG shop at BFN for nearly a decade, I have endeavored to contribute to a more positive work environment by assisting colleagues in addressing both workplace and personal challenges. With three ongoing generations of my family working at BFN, including my son as a system engineer, our collective ties to TVA run strong. I am deeply committed to the prospect of leveraging my experience to continue contributing to the betterment of TVA, if granted the opportunity to serve in an elected capacity.
