Electrical Engineer, Power Systems
Senior Program Manager, Controls Engineering
Power Utilization Engineer

Other Information: I would like to serve as a member of the TVARS Board to support the generous retirement benefits offered by TVA, and to help employees understand and learn how to leverage these benefits.

Through my time at TVA, I have made many friends across the valley. We all look to our TVA retirement to sustain ourselves and our families in our later years. I want my family, as well as all retired and current employees, to have confidence in our retirement benefits. I am seeking a board position to ensure our retirement benefits remain strong and that decisions are made with fiduciary responsibility for those invested. I have served in a variety of volunteer roles and am passionate about helping others. I feel that a TVARS Board position is a way I can make a positive impact for my fellow TVA employees.

I have been in several EA represented positions during my 19 years at TVA. I am currently the Customer Service Engineer for the East Region where I work daily to meet the needs and expectations of 11 local power company partners and 3 direct-served customers. One of my primary responsibilities is ensuring correct billing for these entities. As a member of the Meter to Cash team I review monthly billing adjustments and corrections to ensure each is understood and corrected appropriately.

I have been investing in retirement savings since starting my work career in 1997. I encourage co-workers to leverage the tools provided through TVARS and our Fidelity account consultants to understand their savings and ways to learn more. I was featured in a November 2021 TVA Today article on financial retirement planning, encouraging employees to save and to utilize our Fidelity consultants.

I am a volunteer financial wellness coordinator. This involves facilitating sessions including budgeting, understanding of investment basics and overall money management. I have led several workshops and assisted individuals in reducing and eliminating debt and preparing for future retirement.

I am a graduate of Leadership Bristol class of 2013/2014 and volunteer with Second Harvest Food Bank, Habit for Humanity, as well as other local agencies. I served on the Holston Habitat for Humanity Board of Directors where duties included fiduciary responsibilities for the organization and two ReStore locations. I also participated in budgeting activities for the organization and their operations. I was a member of the Discovery Church Bristol operations team, with a focus on budget and church operations.

As a TVA employee, I treat TVA's money as I do my own, ensuring that anything spent is done so wisely. As a member of the retirement board, I would work to make sure the retirement needs of TVA employees remain intact. This includes ensuring the monies in the retirement system are treated as belonging to employees and retirees and are handled in ways that benefit those receiving the benefit.

INFORMATION IS BASED ON THE CANDIDATE'S REPRESENTATION.
